

Company Profile

MetroAfrica Group Limited is a Tanzania-based construction agency and infrastructure development company delivering practical construction advice, site assessment, design coordination, cost planning, renovation, landscape, and interior services.

Construction agency and infrastructure development | Tanzania

Core promise

Reliable, safe, and durable built environments supported by accountable technical guidance.

Client focus

Government, commercial, institutional, and private clients that need clarity before construction begins.

Who We Are

MetroAfrica Group Limited supports clients from the earliest project conversation through technical assessment, design coordination, cost planning, execution, and handover. The company is structured for clients who need practical construction expertise and clear decision support before committing capital to a site.

The company operates from Tanzania and serves projects that require disciplined planning, safety awareness, quality control, and durable infrastructure value.

Vision

To become a trusted partner in construction and infrastructure development across Africa.

Mission

To deliver professional construction services through consultation, assessment, design, costing, and reliable delivery.

Service Capabilities

Site visits and assessments

Feasibility notes, site risks, access review, and practical next-step recommendations.

Consultation and advisory

Client brief alignment, budget guidance, timeline planning, and project decision support.

Surveying and soil investigation

Survey coordination and ground condition inputs for safer technical decisions.

Architectural and structural design

Buildable design coordination for functional, compliant, and durable spaces.

BOQ and cost estimation

Quantities, cost estimates, material schedules, and procurement-ready documentation.

Construction and renovation

New works, rehabilitation, finishing, and supervised delivery with quality control.

Garden and landscape design

Outdoor usability, paving, planting zones, drainage awareness, and site experience.

Interior design and finishing

Interior concepts, finish schedules, material guidance, and fit-out coordination.

Reference Images and Explanations

The images below represent the project categories and service contexts supported by the website and CMS. They can be replaced with approved real project photography as the portfolio grows.

Commercial construction

Building delivery, material coordination, site supervision, and quality checks for commercial spaces.

Infrastructure works

Road, drainage, survey, and public infrastructure coordination with clear technical sequencing.

Renovation and handover

Rehabilitation, finishing, landscape frontage, and handover-ready documentation.

Design and interiors

Architectural coordination, interiors, finish schedules, and client-facing design clarity.

Delivery Method

1. Consult

Understand goals, budget expectations, timeline, approvals, and project context.

2. Assess

Visit the site, review conditions, identify risks, and define technical next steps.

3. Design

Coordinate architecture, structure, survey input, BOQ, and buildability.

4. Deliver

Execute work with safety, quality control, communication, and disciplined handover.

Why Clients Choose MetroAfrica

Integrity

Clear advice, transparent documentation, and responsible project communication.

Quality

Durable materials, disciplined supervision, and long-term asset performance.

Safety

Work planning that protects people, property, timelines, and project value.

Innovation

Practical modern methods and efficient workflows for site challenges.
